Queue Announcer

Staff guide: calling out orders at the counter

Panduan staf: memanggil pesanan di kaunter

For version 1.4.2 and later

What this guide is about

Queue Announcer calls out orders for you. You type the order code from the receipt, and the computer plays a bell and reads the code out loud, so customers know their food is ready. This guide shows you how to set it up and use it at the counter.

Queue Announcer memanggil pesanan untuk anda. Taip kod pesanan daripada resit, dan komputer akan membunyikan loceng dan menyebut kod itu dengan kuat, supaya pelanggan tahu makanan mereka sudah siap. Panduan ini menunjukkan cara memasang dan menggunakannya di kaunter.

"A, 1, 0, 5. Please collect your order."

What customers hear · Apa yang pelanggan dengar

Who it's for: counter staff and supervisors.
Untuk: staf kaunter dan penyelia.

Version: written for Queue Announcer **1.4.2**.
Versi: ditulis untuk Queue Announcer 1.4.2.

Language: English, with Bahasa Melayu in grey under each step.

6 Quick fixes

No sound
Mute not red? Volume up in Settings? Edge not muted in Windows **Volume mixer**?
Tiada bunyi: Mute merah? Kelantangan rendah? Edge disenyapkan dalam Volume mixer?

Bell plays, no voice
Check Edge isn't muted, then tap **Repeat**. Check the internet.
Loceng berbunyi, tiada suara: pastikan Edge tidak senyap, tekan Repeat. Semak internet.

Voice sounds robotic
Open from the desktop icon, not another browser. Update Edge.
Suara seperti robot: buka dari ikon desktop, bukan pelayar lain. Kemas kini Edge.

No floating window
Settings → **Float on top of other apps**. Edge on a computer only.
Tiada tetingkap terapung: Settings → "Float on top of other apps". Edge di komputer sahaja.

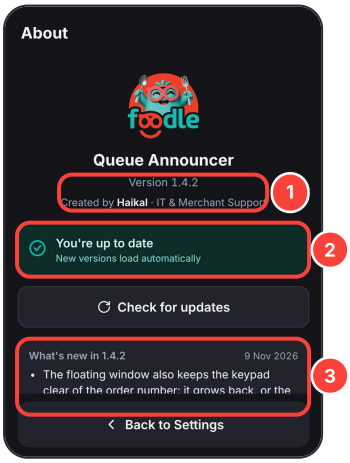

Announcer disappeared
The small tab was closed. Open the app again from the desktop icon.
Announcer hilang: tab kecil telah ditutup. Buka semula dari ikon desktop.

Don't know the PIN
Ask **IT**. Volume and Float on top work without it.
Tak tahu PIN: tanya IT. Kelantangan dan Float on top boleh guna tanpa PIN.

Settings changed by mistake
Settings → **Reset to default settings**, tap it twice.
Tetapan berubah: Settings → "Reset to default settings", tekan dua kali.

Need the newest version
Close the app fully and reopen. Check **About & version**.
Versi terkini: tutup app sepenuhnya dan buka semula. Semak "About & version".
