# Queue Announcer

Staff guide: calling out orders at the counter

For version 1.4.0 and later

## What this guide is about

Queue Announcer calls out orders for you. You type the order code from the receipt, and the computer plays a bell and reads the code out loud, so customers know their food is ready. This guide shows you how to set it up and use it at the counter.

> **"A, 1, 0, 5.** Please collect your order."
> "Once again, A, 1, 0, 5."

**Who it's for:** counter staff and supervisors.

**Version:** written for Queue Announcer **1.4.0**.

# Contents

Tap or click a section to jump straight to it. Every page has a **Contents** link at the bottom to come back here.

1 **Install** — What you need and how to put it on a PC ..... 3

2 **Announce an order** — Type, announce, and what each button does ..... 4

3 **Call again from Recent** — Recall an order that was already called ..... 5

4 **Floating window** — Keeping the announcer on top of other apps ..... 5

5 **Settings** — Volume, unlocking with the PIN, and options ..... 6

6 **Quick fixes** — What to do when something goes wrong ..... 8

# 1 Install

## You need

**Microsoft Edge**
On a computer, for the Clara voice.

**Speakers on**
Loud enough for the counter.

**Internet**
To start. Keeps working if it drops.

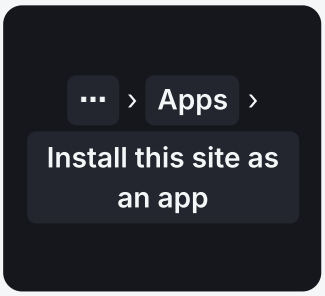

## Install it (one time per PC)

1

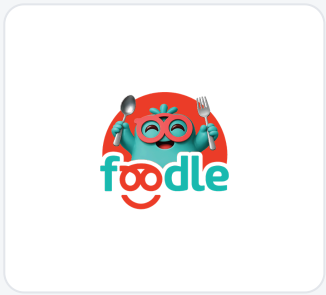

Open the link in Edge

2

Install it

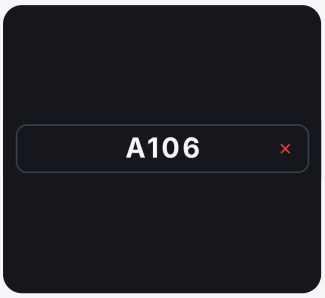

3

Open from the desktop icon

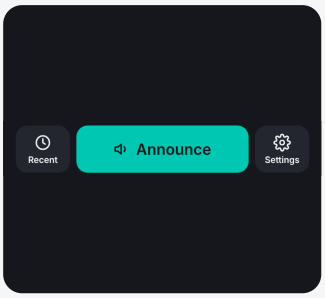

**Updates install themselves.** No need to reinstall.

# 2 Announce an order

**Type the code**

From the receipt

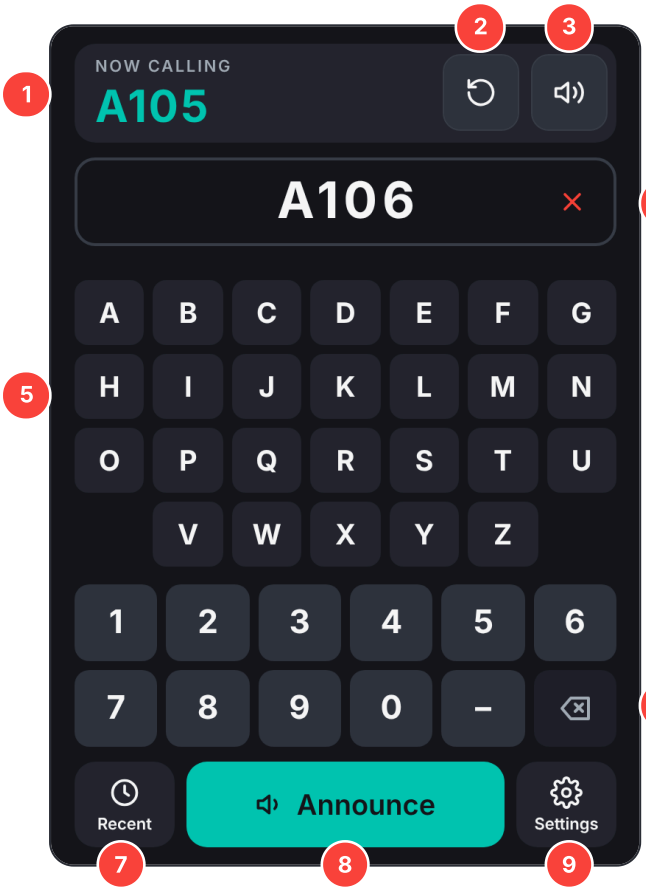

**Tap Announce**

**Bell + voice, twice**

Wait until it finishes

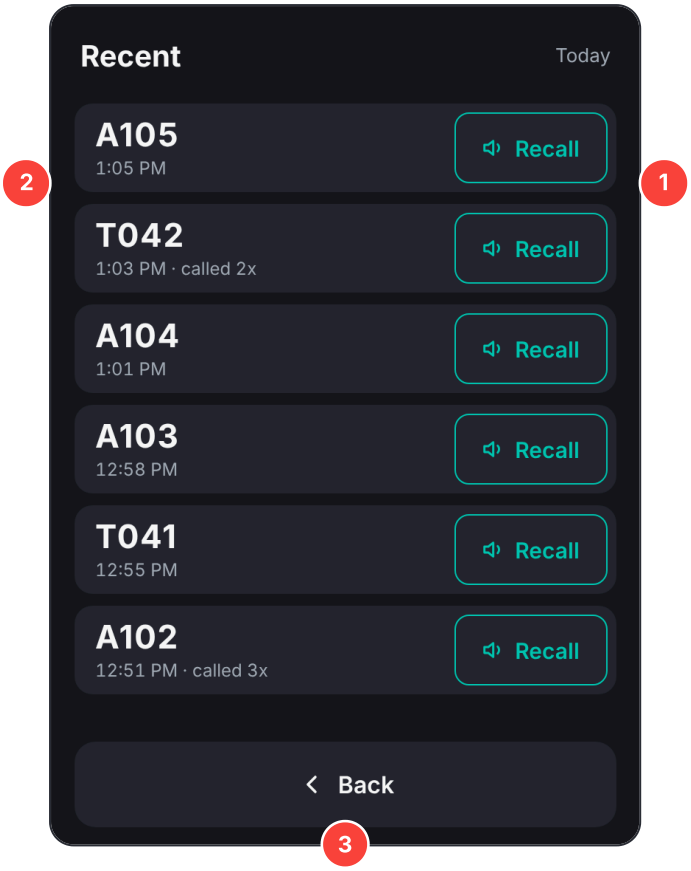

1. Now calling
2. **Repeat** last order
3. **Mute** (red = off)
4. ✕ clear code
5. Letters and numbers
6. ⌫ delete one
7. **Recent** orders
8. **Announce**
9. **Settings**

**One at a time.** Next code can be typed while it speaks.

Up to **8** characters, e.g. **T-042**.

Keyboard: Enter announce, Esc clear.

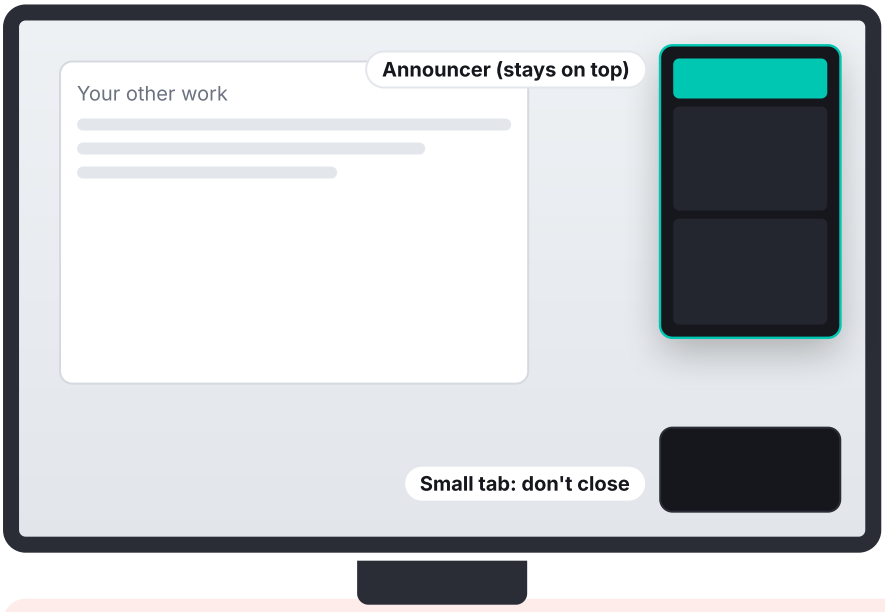

## 3 Call again from Recent

1. **Recall** plays it again
2. Code, time, times called
3. **Back** to the keypad

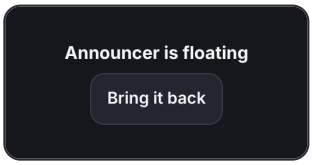

Today only, on this PC. Swipe to scroll.

## 4 Floating window

**First tap** → announcer floats on top. Drag it where you like.

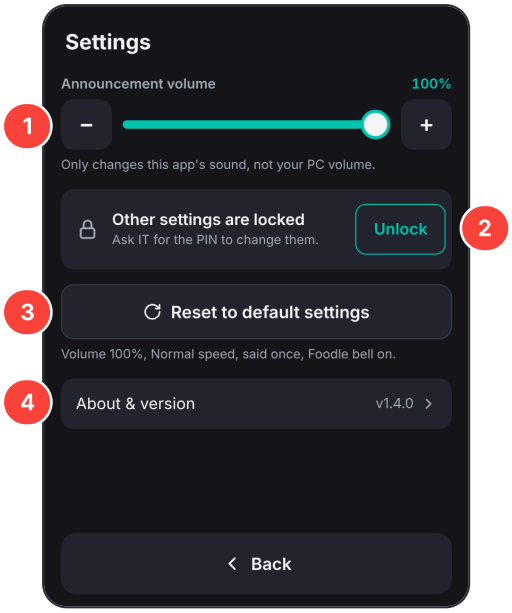

**Small tab** moves to the bottom right.

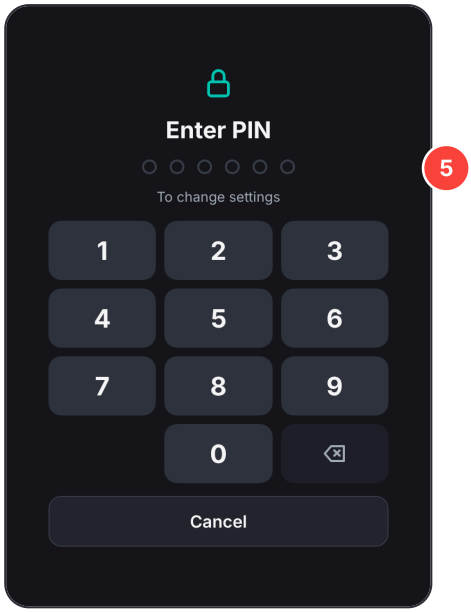

**Bring it back** returns it to the main window.

**Don't close the small tab**: it closes the announcer too. Minimize it with **–** instead.

# 5 Settings

Locked (normal)

After tapping Unlock

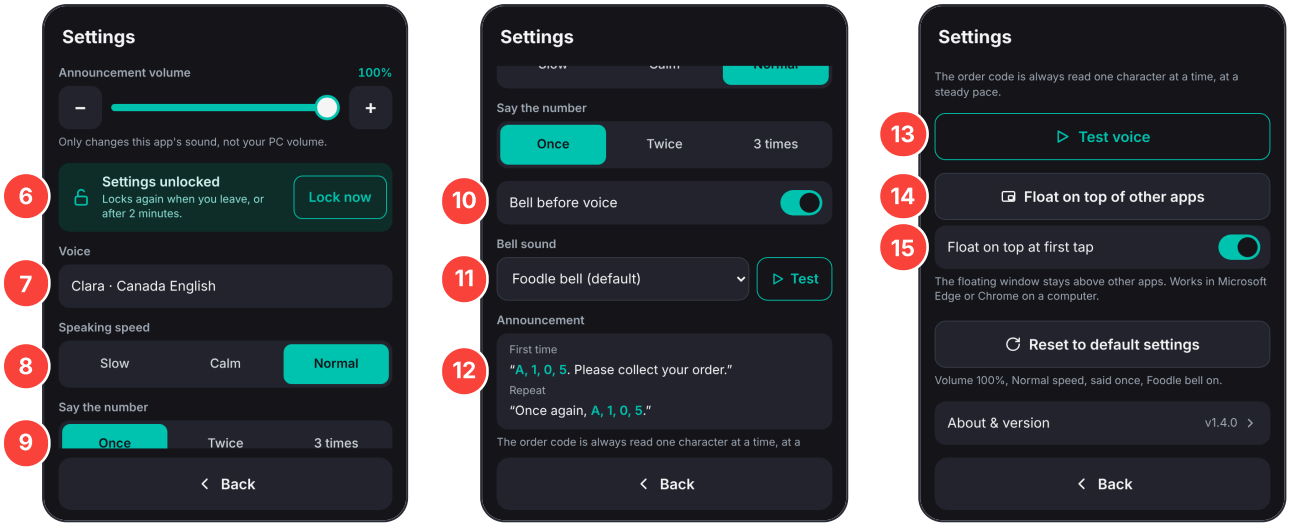

1. **Volume**: anyone can change it
2. **Unlock** to change anything else
3. **Reset to default settings**: tap twice, no PIN
4. **About & version**: open to everyone
5. Type the **PIN** from IT

Locks again when you leave, or after **2 minutes**.

**5 wrong tries**: wait 30 seconds.

Don't know the PIN? Ask **IT**.

# Settings, unlocked

6. **Lock now**
7. **Voice**: Clara
8. **Speed** of the words
9. Say it 1, 2 or 3 times
10. **Bell** on / off
11. Bell sound + **Test**
12. What will be said
13. **Test voice**
14. Open **floating window**
15. Float at first tap

Each PC keeps its own settings. **Reset to default** brings back: volume 100%, Normal speed, said once, bell on.

# 6 Quick fixes

### No sound
Mute not red? Volume up in Settings? Edge not muted in Windows **Volume mixer**?

### Bell plays, no voice
Check Edge isn't muted, then tap **Repeat**. Check the internet.

### Voice sounds robotic
Open from the desktop icon, not another browser. Update Edge.

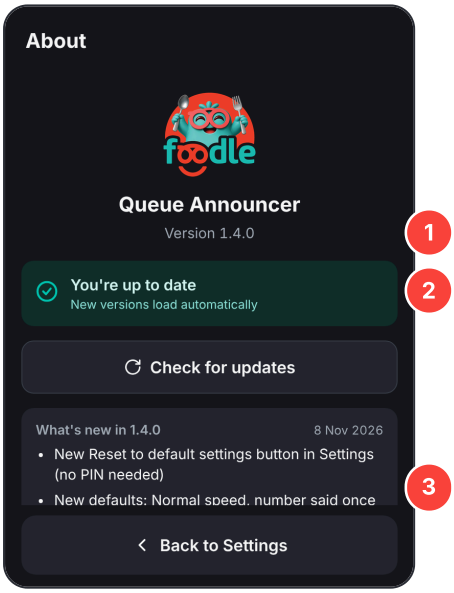

### No floating window
Settings → **Float on top of other apps**. Edge on a computer only.

### Announcer disappeared
The small tab was closed. Open the app again from the desktop icon.

### Don't know the PIN
Ask **IT**. Volume works without it.

### Settings changed by mistake
Settings → **Reset to default settings**, tap it twice.

### Need the newest version
Close the app fully and reopen. Check **About & version**.

### Which version am I on?

1. Version number
2. Up to date or not
3. What changed (older versions below)

| CALL | AGAIN | SILENCE | FIX TYPING |
|---|---|---|---|
| Code → Announce | Repeat · Recall | Mute | ⌫ one · × all |
